

# Helping Creative Teams Free Up Time to be Creative

If your creative team spends too much time managing projects and too little of it actually plying their craft, it's hard to get a marketing campaign or program off the ground. In fact, Wrike.com's 2016 Agile Marketing Survey found that **82% of creatives spend at least 25% of their time managing projects vs. doing creative work.**

From branding redesigns and websites to integrated marketing campaign assets, creative teams are routinely challenged to cultivate high-impact visual communications elements on increasingly tight deadlines. **Here's how Ai can help.**

## YOUR TIME IS TOO VALUABLE TO BE STUCK IN THE WEEDS

Wrike's study also found that 67% of creative professionals spend at least 25% of their time managing ad-hoc requests on top of their ongoing projects.

Ai's ability to scale services based on immediate needs enables us to take on creative work at any stage of your marketing plan's implementation, from handling overflow and ad-hoc work to full branding projects.
