

Cloud Services

Our CORE-4 Print-on-Demand service and software is designed for simplicity and easy integration with your company's infrastructure. The result is a smooth launch and the reliable convenience of 24/7 order placement.

Print-on-Demand streamlines the printing process for most standard items, such as stationery, business cards, sales collateral, brochures, and more.

WORK SMARTER

Online ordering reduces or eliminates multiple emails and phone calls, freeing your personnel for more productive work and reducing budgets.

REDUCE COSTS

One-time creation of standard templates reduces unit costs for new documents.

GET IT FASTER

Turnaround is significantly reduced, with time between order placement and shipment of the finished product frequently as low as 24 hours.

SECURE YOUR FILES

Structured flexibility, with password protection and limited right-of-entry, ensures security while offering controlled freedom-of-use by all approved personnel.

STREAMLINE WORKFLOW

Built-in user profiling allows creation of real-time reporting and detailed workflow metrics for better budget analysis and planning.

ELIMINATE WASTE

Ordering only "as needed" eliminates inventory storage and the risks of extended shelf life.

MAINTAIN CONSISTENCY

Brand integrity is preserved using pre-approved formats and templates coupled with easily customizable options, depending on pre-set permission levels.
